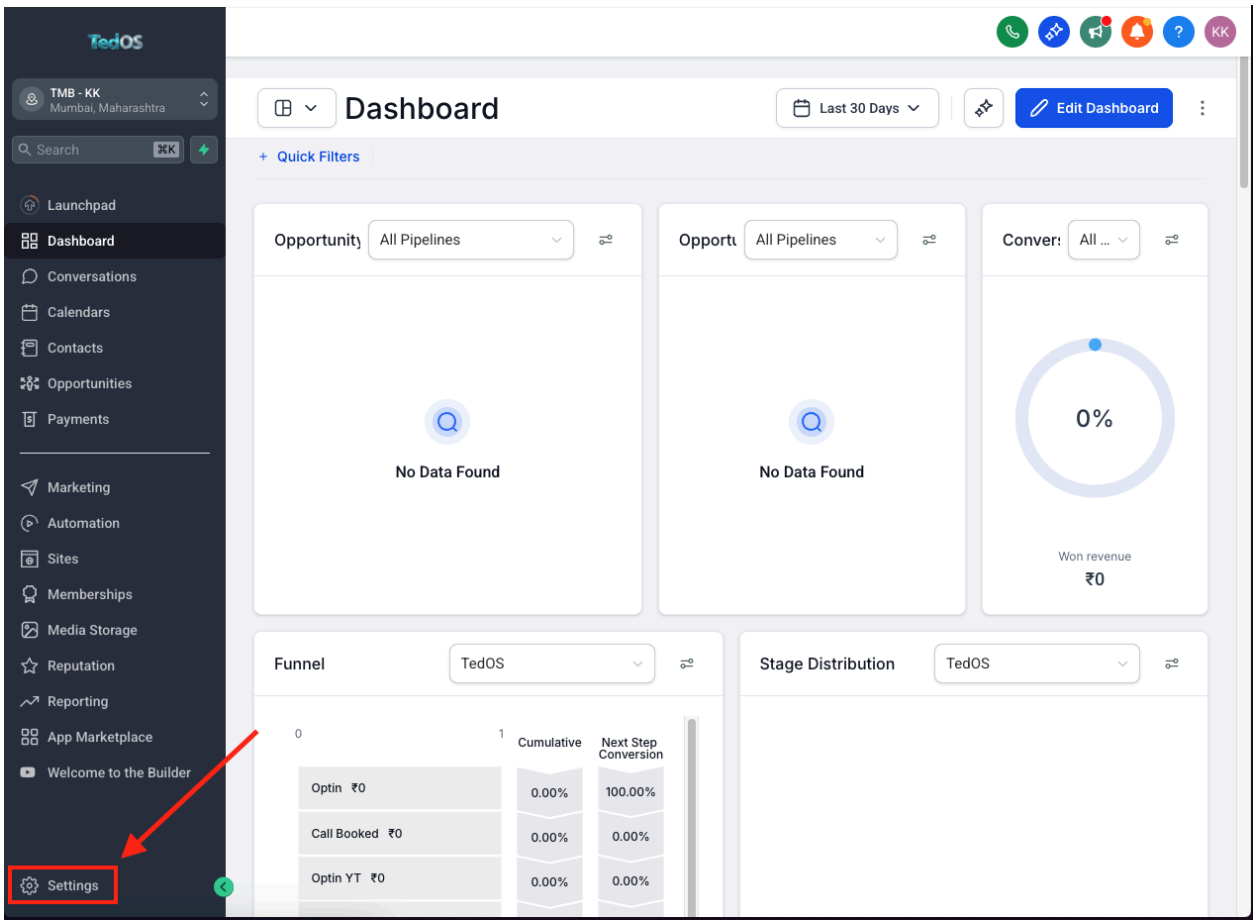
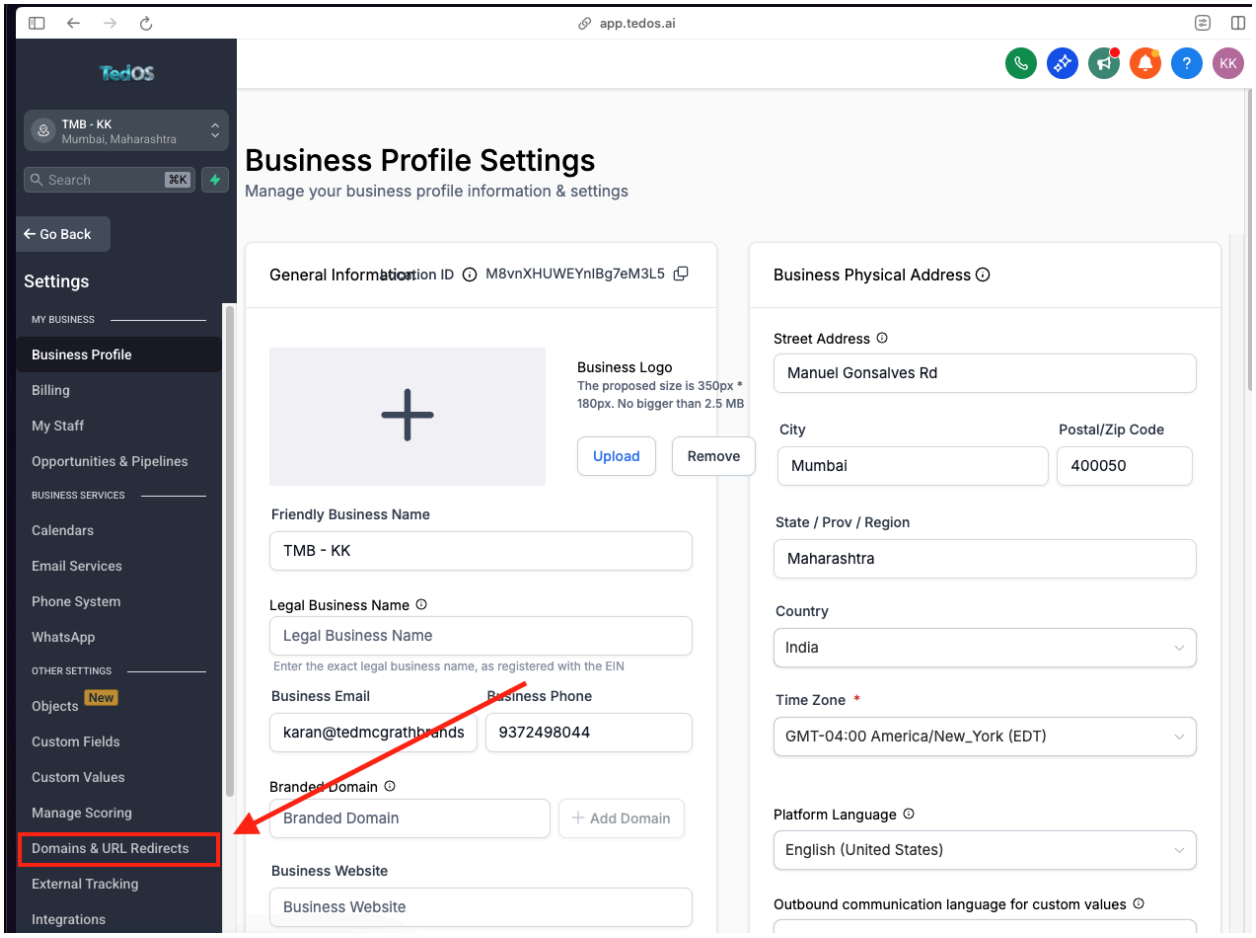
Step 1:
Open TedOS Builder (app.TedOS.ai)

Step 2:
Click on “Settings” in the bottom left corner.



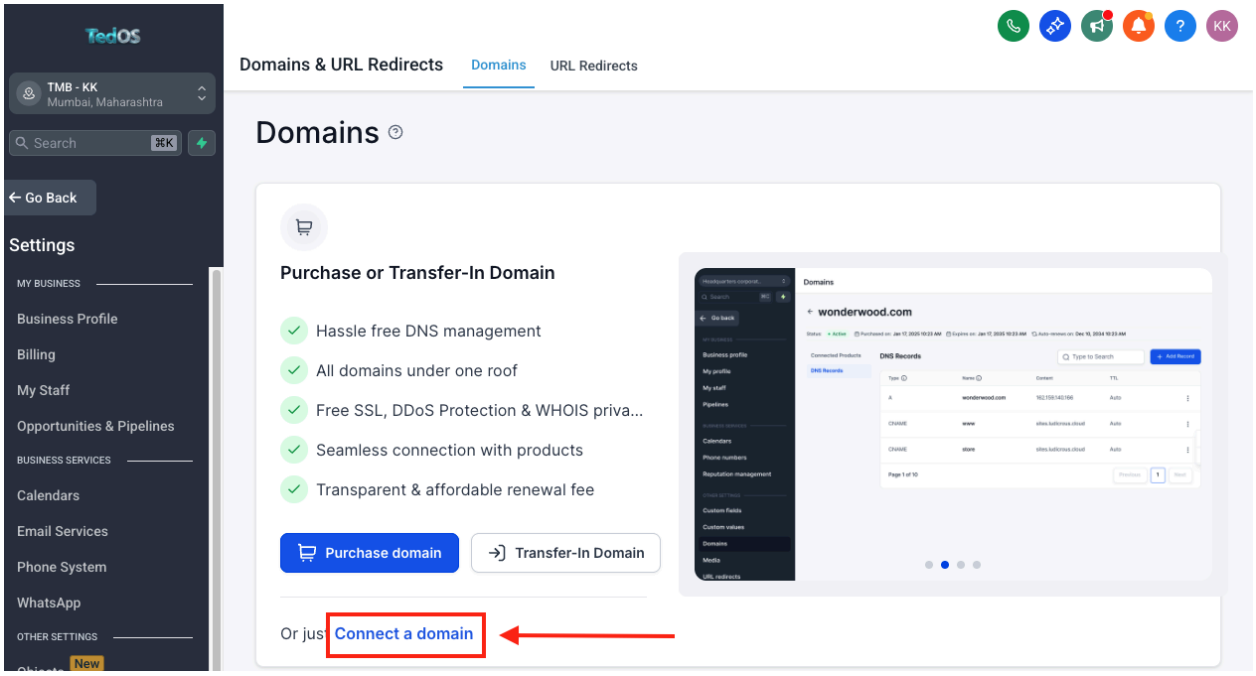
Step 3:

Click on “Domains & URL Redirects” on the left sidebar menu.



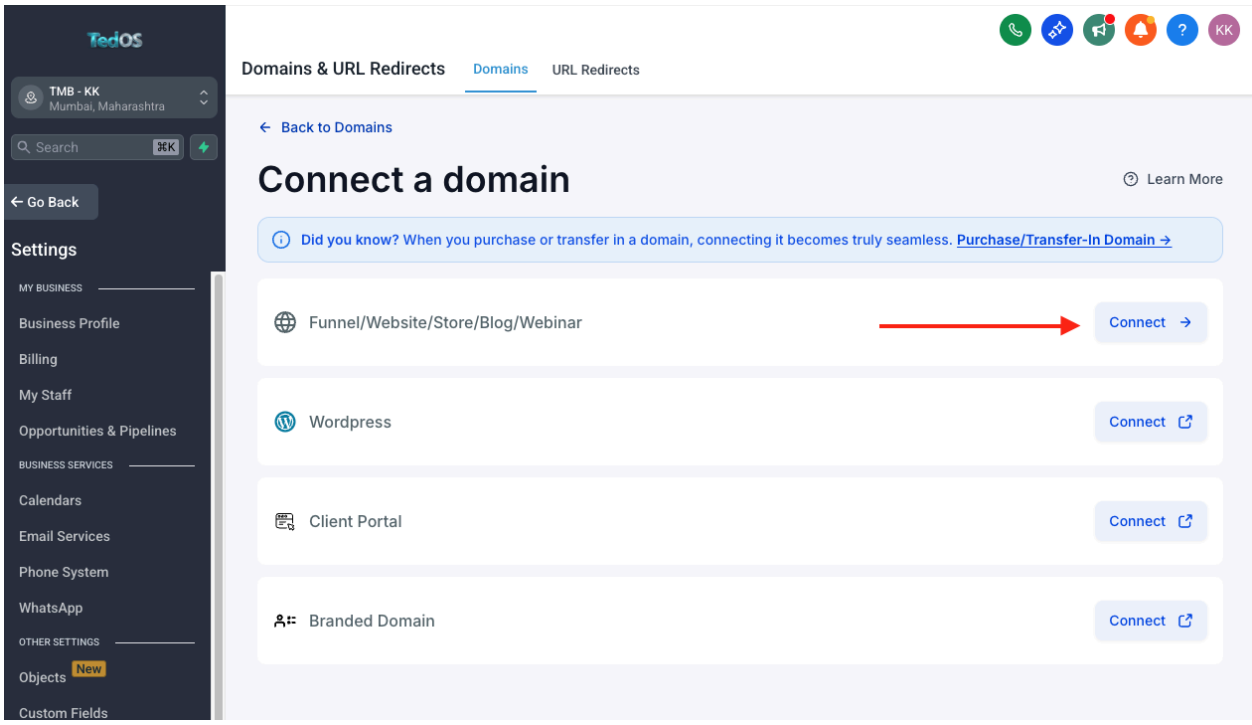
Step 4:

Click on the “Connect a domain” blue text.



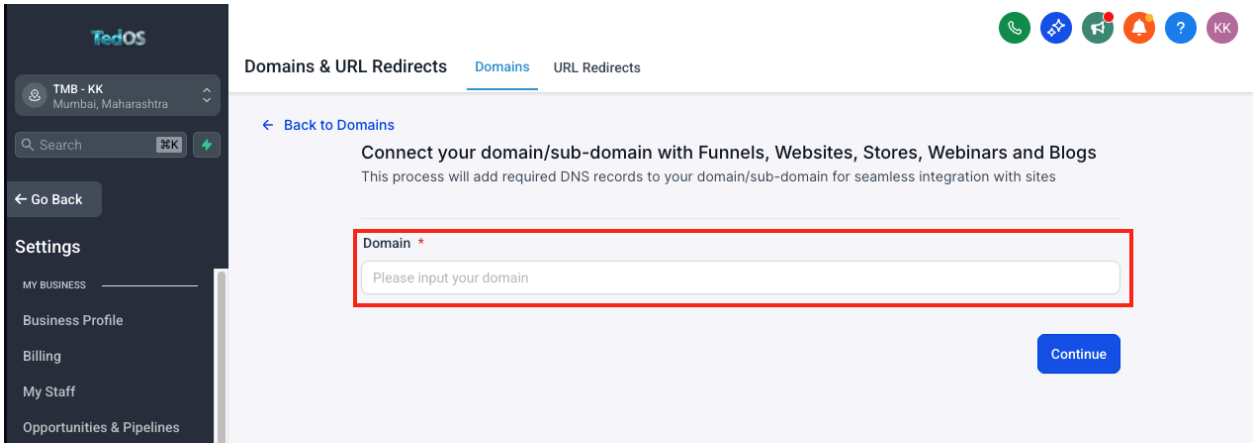
Step 5:

Click on the first “Connect” blue button on the right of “Funnel/Website/Store/Blog/Webinar”.



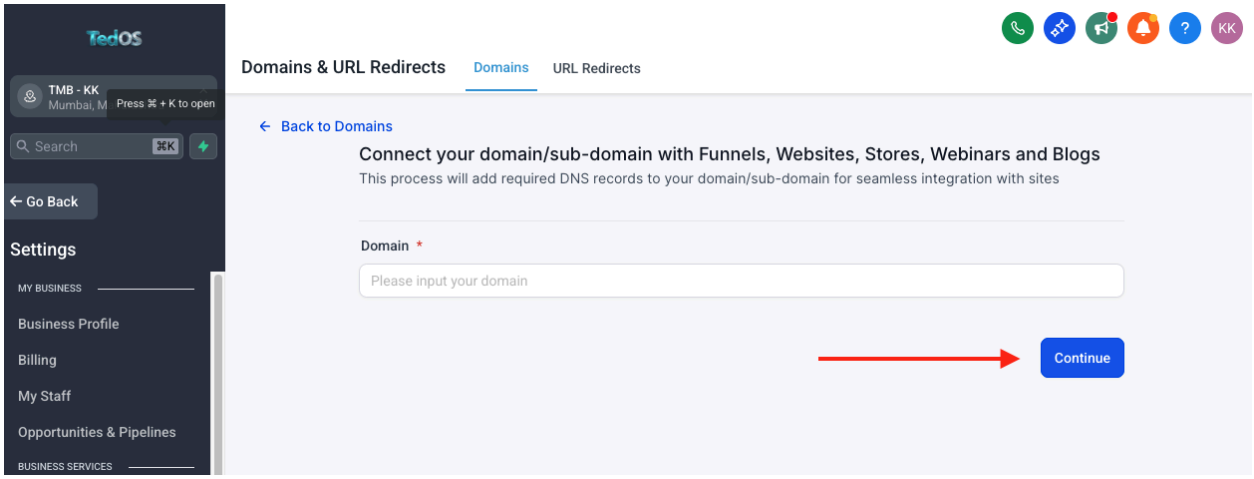
Step 6:

Type an available & owned domain or sub-domain in.



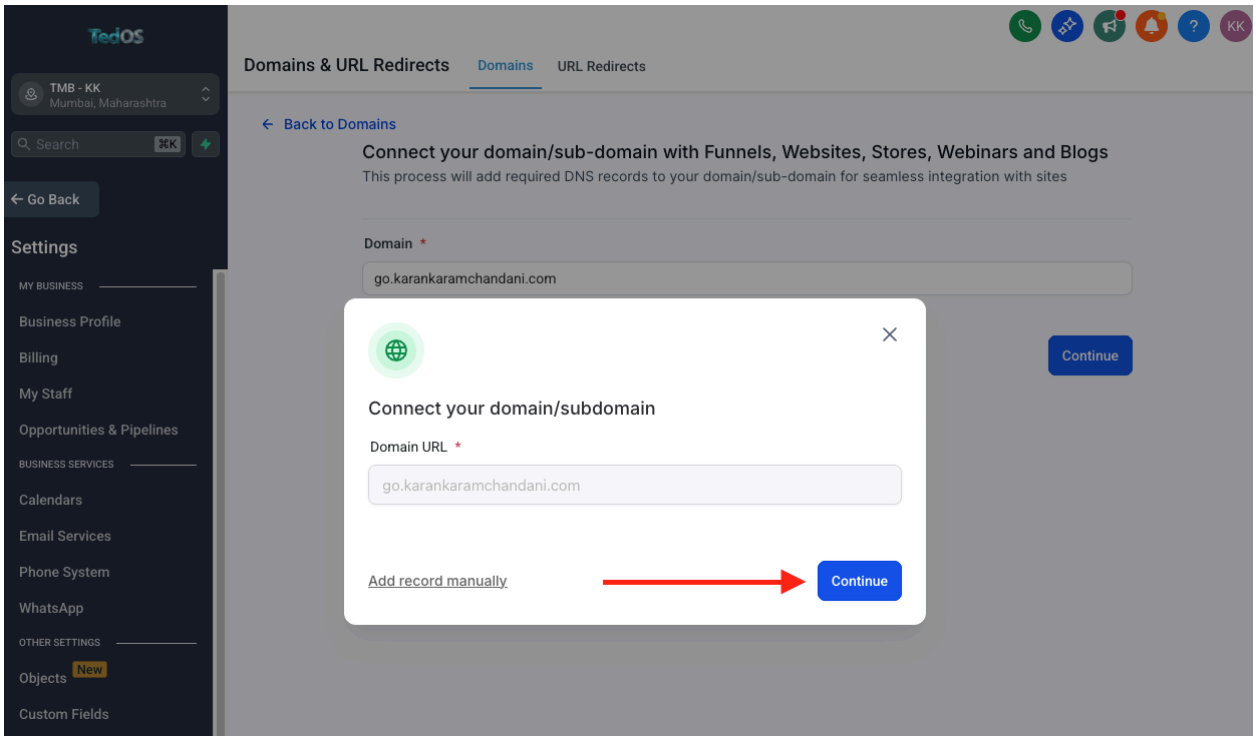
Step 7:

Click on the blue “Continue” button.



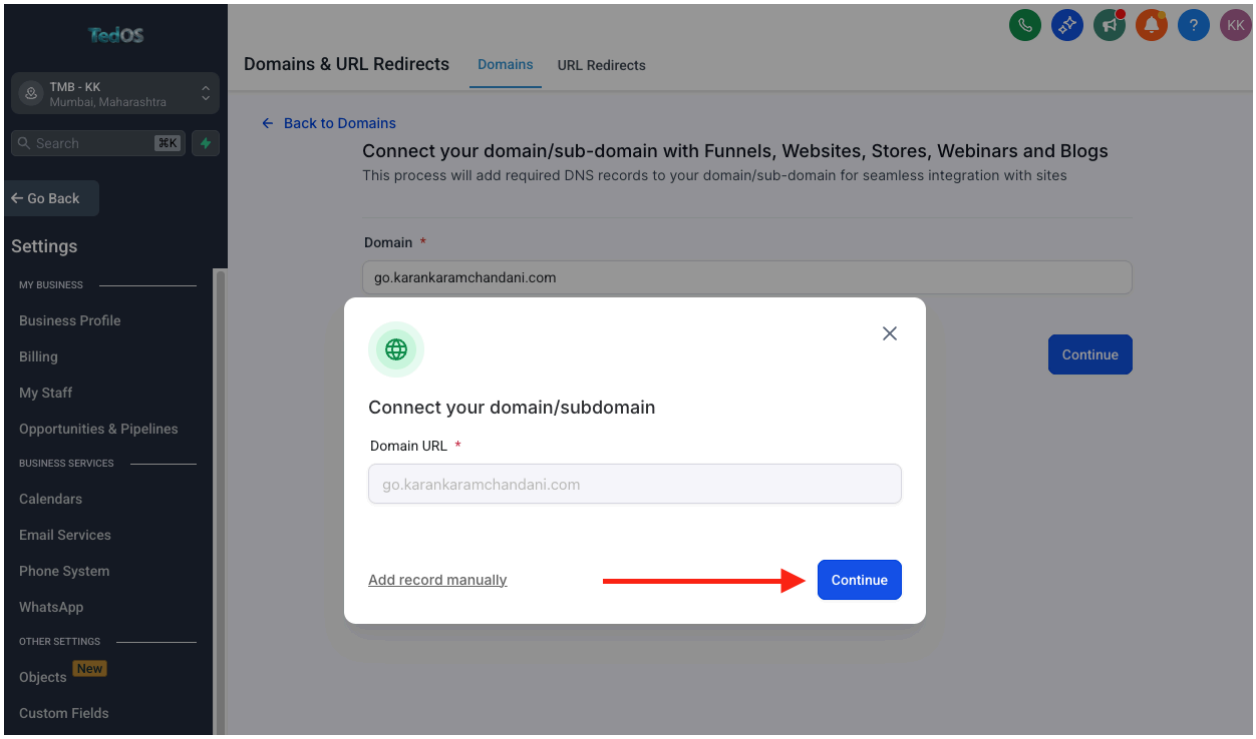
Step 8:

Verify if the domain is correct. If it is, then click on the blue “Continue” button.



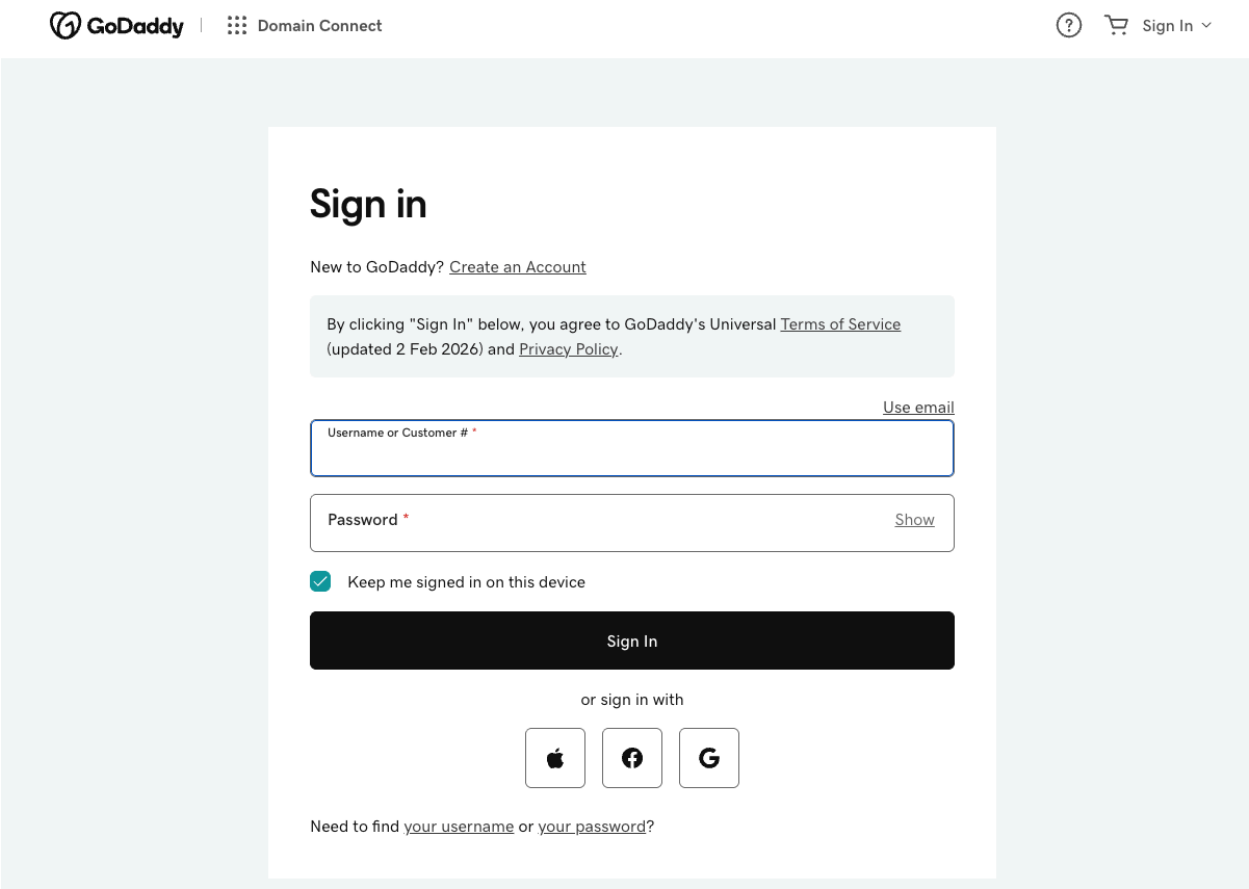
Step 9:

If your domain is hosted on GoDaddy, then TedOS will show you the confirmation that it's found your domain. Click on the blue "Authorize domain" button.



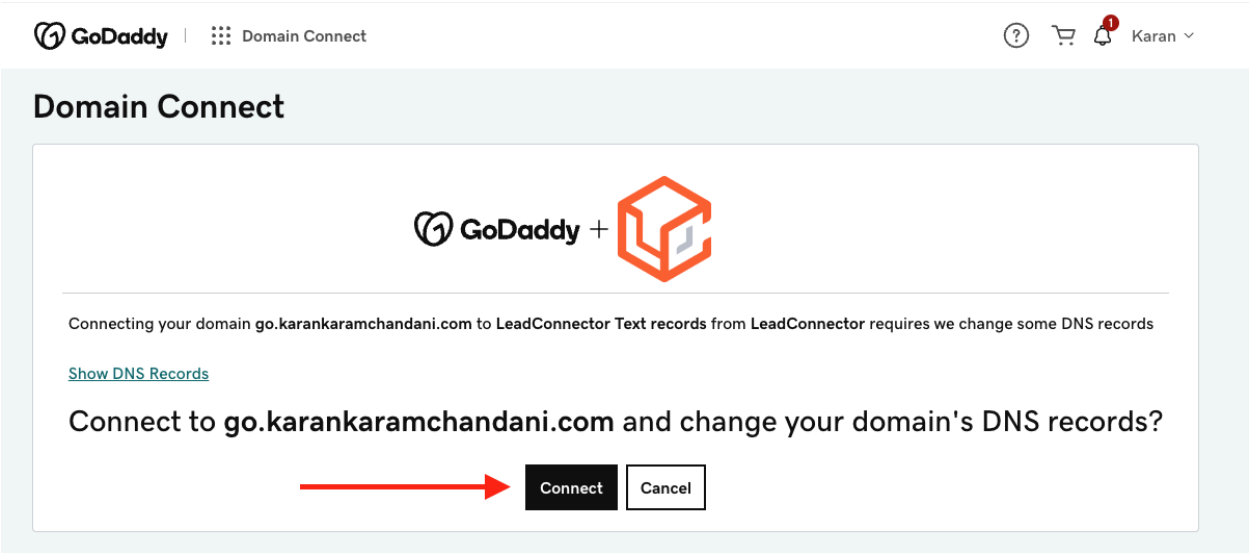
Step 10:

Login to GoDaddy.



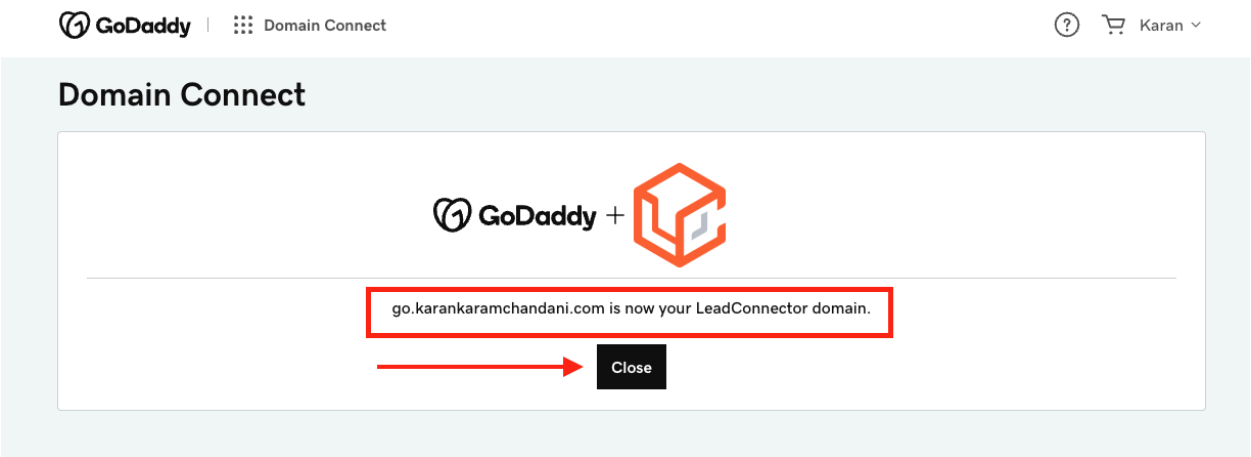
Step 11:

Click on the black “Connect” button.



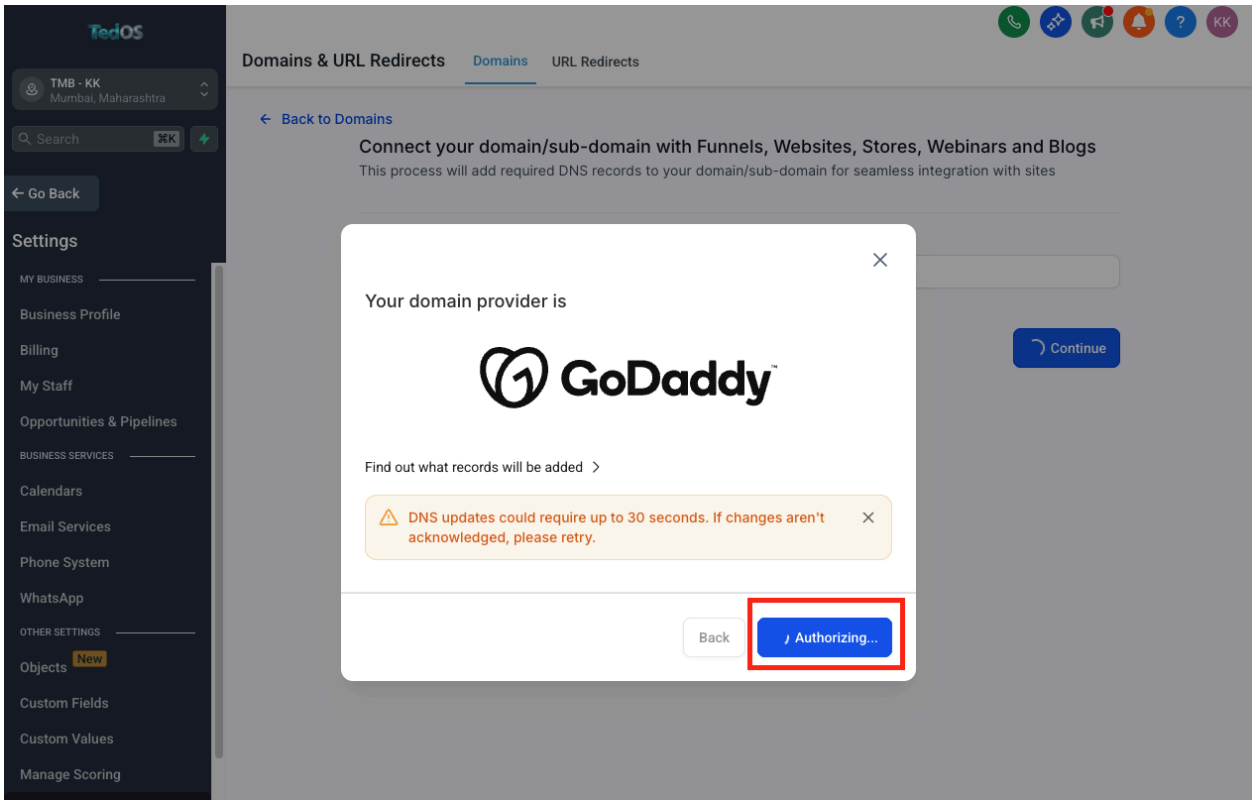
Step 12:

Wait for the confirmation message from GoDaddy saying “[domain name] is now your LeadConnector domain”. Then click on the black “Close” button.



Step 13:

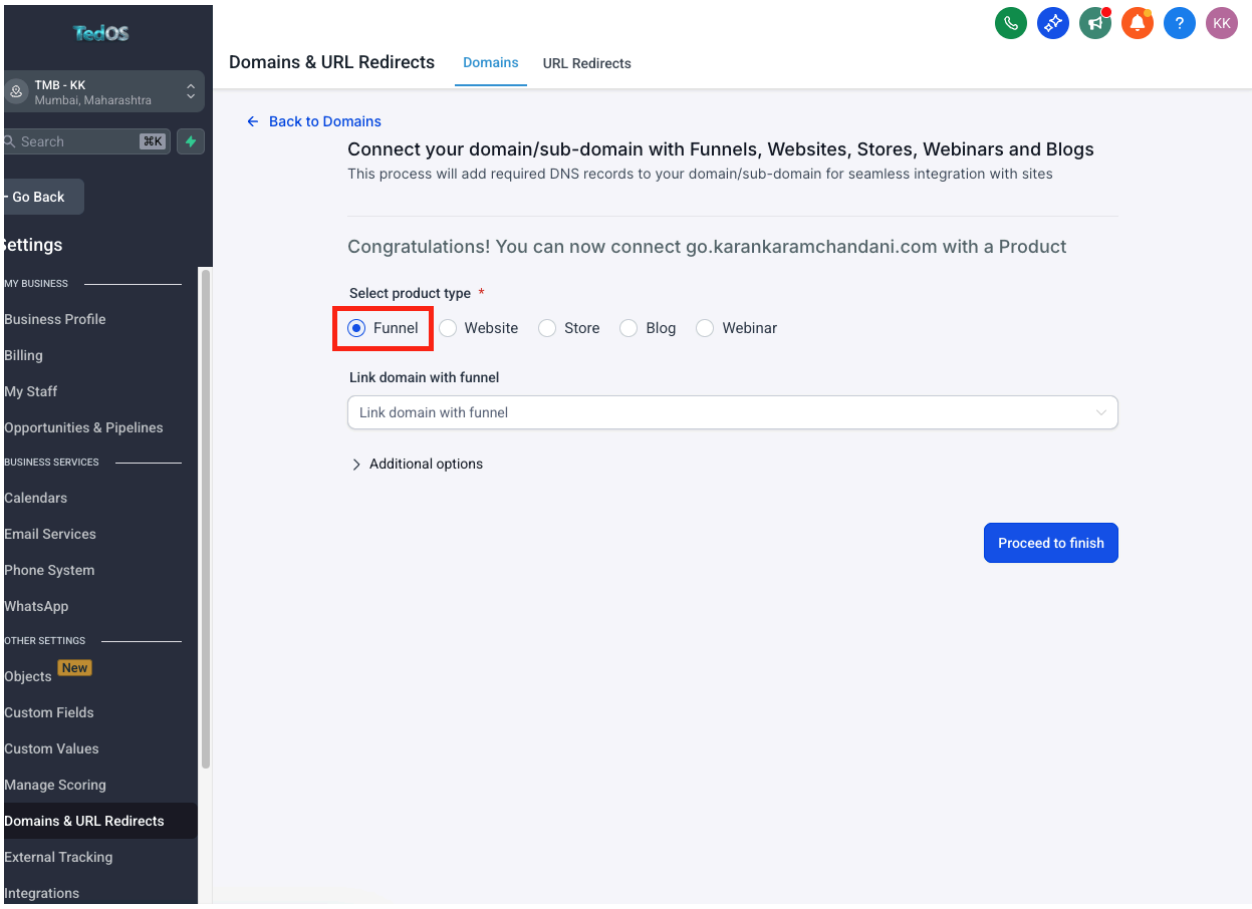
You will be directed back to TedOS, where TedOS will continue to authorise your domain for 30-60 seconds.



Step 14:

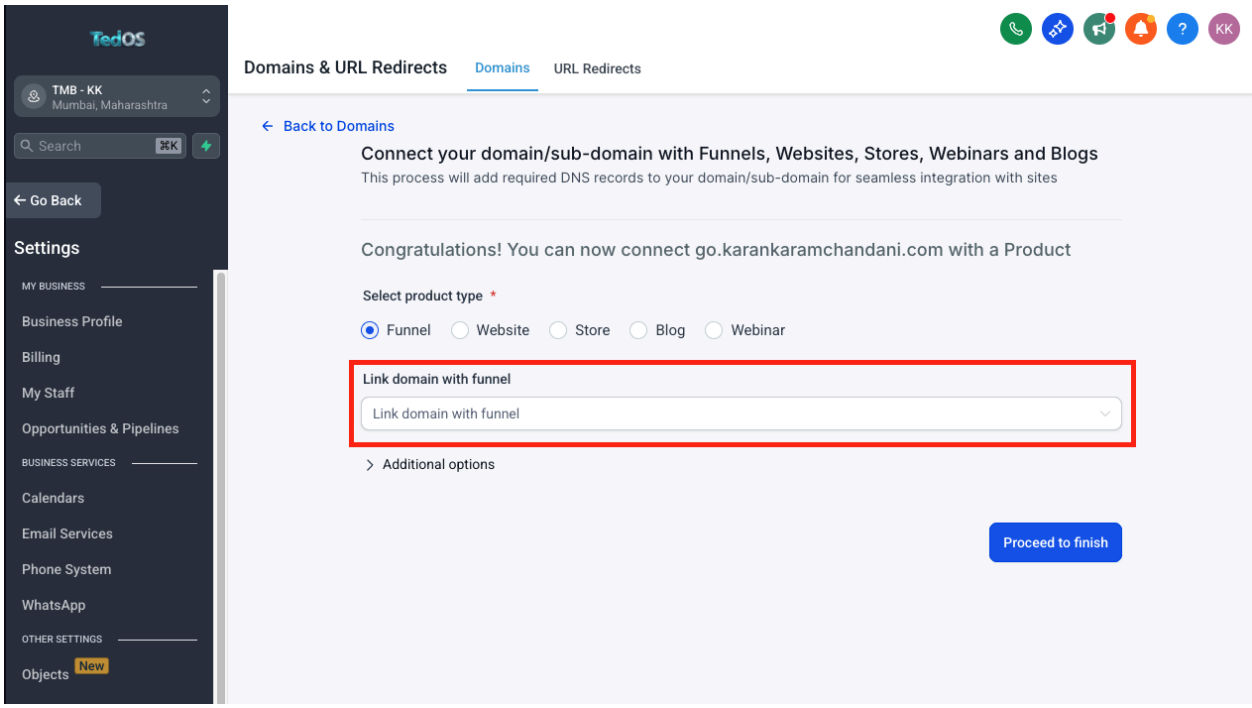
Once authorisation is complete, you will be directed to a confirmation page to connect your domain to a specific funnel.

Please select (if not pre-selected) “Funnel” under product type.



Step 15:

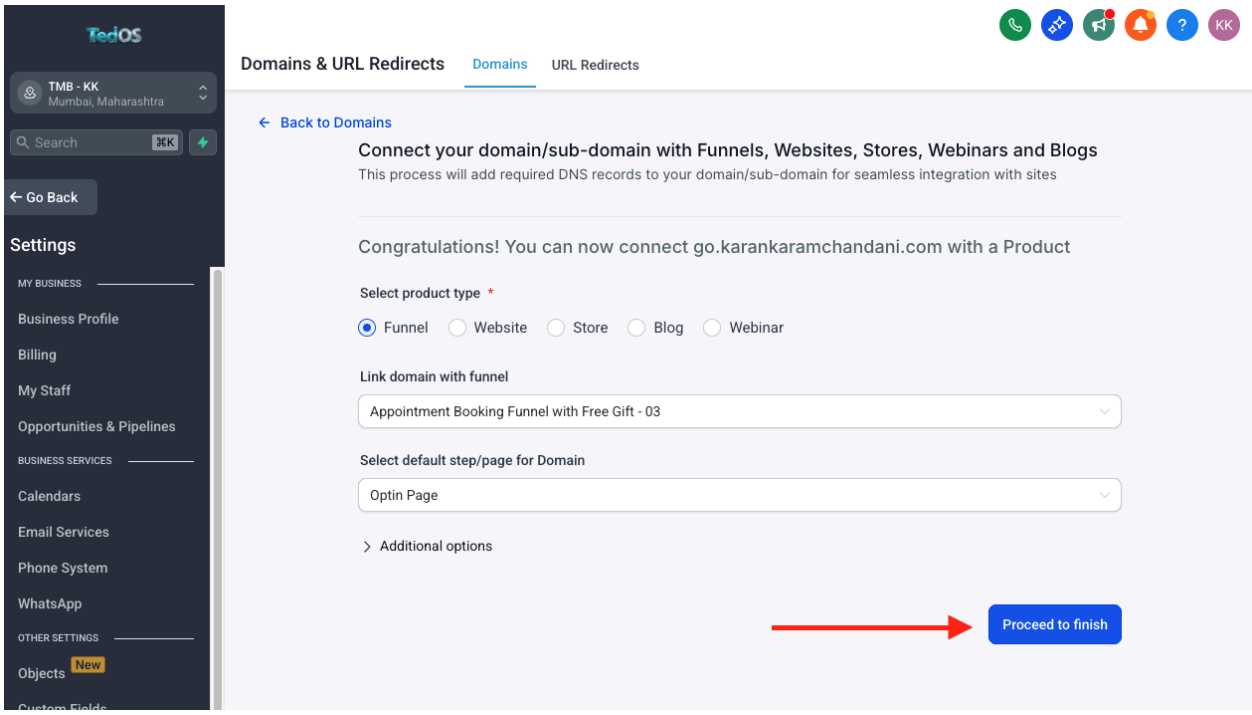
Click on “Link domain with funnel” and select “Appointment Booking Funnel with Free Gift - 03”.



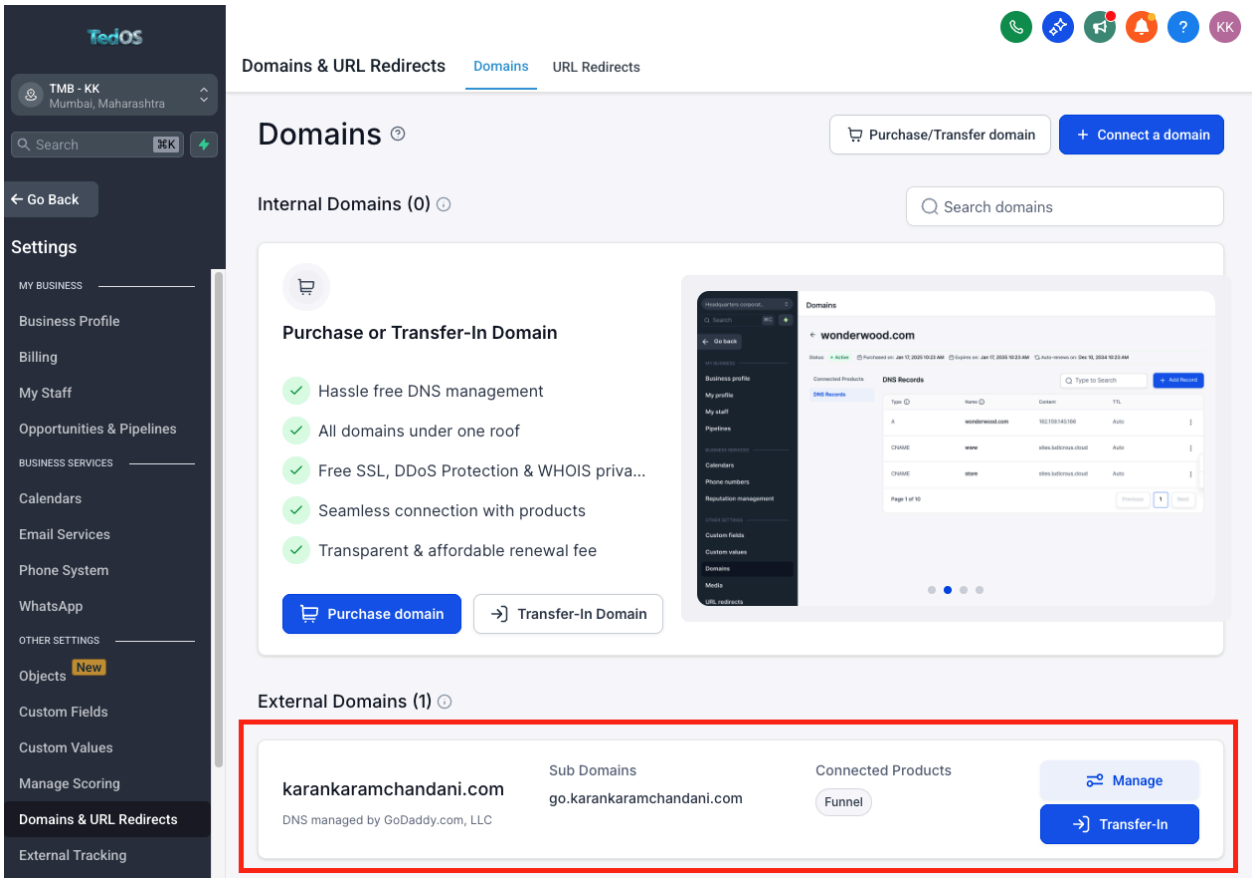
Step 16:

When “Appointment Booking Funnel with Free Gift - 03” is selected as the funnel, the “Optin Page” will be selected by default for the funnel step.

Click on the blue “Proceed to finish” button.



Step 17:

Your domain is connected successfully ✅


You should be able to see your domain under “External Domains”
